MUELLER® Centurion® Fire Hydrant with the New Mueller® Integral Storz Pumper Connection

Quick-Connect/Full Pressure Rating

Now any Mueller Centurion Hydrant, traditional or modern style, can be ordered with an integral, Mueller designed and manufactured storz connection on the pumper nozzle. The connection is also available separately to retrofit hydrants in the field. Making our own storz connection means your Centurion hydrants remain '100% Mueller' for assurance of reliability.

The Mueller Storz Connection allows the fire department to connect its pumper hose to the hydrant with a quick, quarter-turn action. The action is fast and smooth so firefighters can get to their tasks quickly without the thread alignment, cross threading, or leakage problems sometimes associated with threaded connections.

The Mueller Storz Option is available for 4" and 5" pumper nozzles on any Centurion 200™, 250™ or Modern hydrant. Hydrants with the storz connection retain their published pressure rating and compliance with AWWA Standard C502. Mueller Storz Connections are manufactured to NFPA-1963 fire hose connection standard and are UL listed and FM Approved. To order, specify storz, size, and locking or non-locking cap. For more information, contact your local authorized Mueller Distributor, Mueller Sales Representative, or call our Customer Service Center at 1-800-423-1323.
